

Please, Please someone put a stop to these continuous telemarketing calls. I have spent many hours on the phone calling all the appropriate agencies to get us 'off of their lists' all to no avail. My husband works the evening shift and is often tired at work due to morning calls. We thought of disconnecting the phone, but our family lives in different states and we need to be in touch at all times. I also have paid the fee to identify the last call when I have been unable to reach it before the 4th ring(or even 1 ring) to check that it was maybe my elderly mother trying to call me, and guess what it is always one of those 'unidentified callers' - MORE MONEY FOR THE PHONE COMPANIES. Why are the telemarketers allowed to be anonymous, it seems like every business in the U.S. KNOWS ME AND MY PHONE NUMBER. I also have to delete all the unwanted messages on the answer machine before I can start to cook dinner for my family. I know that the officials that make the decisions on this matter have the financial resources to buy all the gizmos and services to make their lives nuisance free, but we the blue collar workers do not. Please help to make our lives a little easier like yours.
